Executive summary

Vidyut Labs is a fictional Hyderabad-based tech-education business that runs project-based cohorts in AI/ML and full-stack development. This document plans a 30-day digital marketing campaign (1–30 December 2026 (30 days) — aligned with semester breaks and New Year resolution season) to fill the January 2027 cohort.

The strategy targets three personas — final-year students, career switchers and parents — through Instagram (awareness and community), LinkedIn (credibility and switchers) and the website (SEO and conversions). Four content pillars keep the feed useful: Educational, Informational, Engagement and Promotional, with promotional content capped at about 20%.

Four campaigns move people through the funnel — **Projects > Certificates** (awareness), **Build Your First AI App** (free workshop, leads), **#ProjectNotPromise** (UGC challenge) and **New Year, New Stack** (enrolment). The 30-day calendar contains 49 planned pieces of content. Headline targets: 600 workshop registrations, 150 counselling calls and 40 enrolments on a ₹150,000 budget (CAC ≤ ₹3,750).

1. Business overview

Vidyut Labs is a fictional business created for this project.

Business	Vidyut Labs (fictional)
Tagline	Build real projects. Get hired.
Industry	EdTech / tech-skills education
Location	Madhapur, Hyderabad (online + weekend offline labs)
Pricing	₹29,999 per cohort (EMI and merit scholarships available)
USP	Every learner ships 4 deployed projects with mentor code review, with doubt-clearing in English and Telugu.
Mission	Turn engineering students and early-career professionals from tier-2/3 colleges into job-ready builders through real projects, not certificates.
Current situation	Vidyut Labs is 1 year old, has ~1,200 Instagram followers, ~500 LinkedIn page followers and a basic website. Most enquiries come through word of mouth. The next cohort starts in January 2027.

What we offer

- 12-week project-based cohorts in AI/ML Engineering and Full-Stack Web Development
- Free weekend workshops (e.g. 'Build Your First AI App')
- 1:1 mentor code reviews by working engineers
- Placement support: resume, GitHub and mock interviews

Positioning statement

> *For engineering students and early-career switchers in Telugu states who are tired of collecting certificates, Vidyut Labs is the project-first tech school that gets you to ship 4 deployed projects with mentor code reviews — unlike self-paced platforms or crowded institutes, we hold you accountable until your portfolio is interview-ready.*

2. Target audience profile

Segment	Who	Age	Where	Need
Primary	Engineering students (2nd–4th year) and fresh graduates	18–24	Telangana & Andhra Pradesh, tier-2/3 colleges	Want a first internship or developer job; know theory but have few real projects.
Secondary	Early-career professionals switching into tech	23–30	Hyderabad (Hitech City, Gachibowli, Ameerpet)	Working in BPO, support or manual testing; want a developer or AI role and higher pay.
Influencer	Parents and college placement officers (TPOs)	40–55	Telugu-speaking households; college campuses	Fund or recommend the course; care about trust, outcomes and value for money.

Demographics

- Age 18–30 (decision makers), 40–55 (parents who pay)
- Education: B.Tech/BCA/B.Sc (CS, IT, AI, ECE) — many from non-premier colleges
- Income: students depend on family; switchers earn roughly ₹2.5–5 LPA
- Languages: English + Telugu (Hindi as a third language)

Psychographics

- Ambitious and career-anxious; compare themselves with peers on LinkedIn
- Value practical, 'show me' learning over lectures
- Distrust institutes that promise '100% placement'
- Price-sensitive but will pay for clear outcomes

Pain points

- College curriculum is theory-heavy; no portfolio to show recruiters
- Overwhelmed by too many free tutorials with no structure or feedback
- Resumes get rejected without interviews
- Fear of being 'too late' (switchers) or 'not smart enough' (students)

Online behaviour

- Instagram: Reels and carousels daily, mostly 7–11 PM
- YouTube: long tutorials and Telugu tech channels
- LinkedIn: job search, following companies, reading career posts
- WhatsApp/Telegram: college groups, job-alert channels
- Google: searches like 'full stack course in Hyderabad', 'AI projects for final year'

Buying triggers

- Semester breaks and results announcements
- Campus placement season and internship drives
- New Year resolutions ('2027 is my year')
- Seeing a peer or senior get placed

3. Buyer personas

Three personas cover the learner, the career switcher and the parent who funds the decision.

Persona 1: Ravi Teja, 21 — The Final-Year Hustler

“I've done 12 online certificates but still no interview calls.”

Background	B.Tech CSE, final year, private college near Warangal
Goals	Land a product-company job before graduation; Build a GitHub portfolio that stands out; Crack technical interviews
Pain points	No real-world projects; Doesn't know which stack to pick; Limited budget
Channels	Instagram Reels, YouTube, LinkedIn, College WhatsApp groups
Objections	'I can learn this free on YouTube.' '₹30k is a lot for my family.'
Key message	**Ship 4 projects recruiters actually open — with a mentor checking your code.**
Content that converts	Project-idea carousels, Roadmap posts, Free workshop, #ProjectNotPromise challenge

Persona 2: Sneha Reddy, 26 — The Career Switcher

“I don't want to be stuck in the same role for five more years.”

Background	Manual tester at an IT services firm, Hitech City
Goals	Move into a developer or AI role; Get a meaningful salary jump; Learn without quitting her job
Pain points	Only evenings and weekends free; Worried it's 'too late' to switch; Past courses felt like lectures, not building
Channels	LinkedIn, YouTube, Instagram (evenings), Google search
Objections	'Will I manage this with a full-time job?' 'Will companies hire a switcher?'
Key message	**Weekend cohort, EMI options and alumni who switched careers just like you.**
Content that converts	Alumni switch stories, LinkedIn document carousels, Fee/EMI explainer, Day-in-the-life Reels

Persona 3: Srinivas Rao, 49 — The Parent-Investor

“There are so many institutes. How do I know this one is genuine?”

Background	Government employee in Guntur, father of a 3rd-year B.Tech student
Goals	See his child get a stable, well-paid job; Spend money on something that clearly works
Pain points	Bad past experience with a coaching centre; Can't judge technical quality himself
Channels	WhatsApp, Facebook, YouTube (Telugu), Word of mouth
Objections	'Is there any guarantee?' 'Can I visit and meet the people?'
Key message	**Transparent outcomes, real alumni you can call, and an open house in Telugu.**
Content that converts	Parent open house, Telugu alumni video testimonials, 'Honest answers' FAQ posts, WhatsApp broadcast

4. Marketing objectives (SMART)

All objectives are Specific, Measurable, Achievable, Relevant and Time-bound (1–30 December 2026).

#	Goal	SMART objective	Measured by
1	Awareness	Grow Instagram followers from 1,200 to 3,000 and LinkedIn page followers from 500 to 1,200 by 30 Dec 2026.	Follower count (platform insights)
2	Engagement	Reach an average engagement rate of ≥5% on Instagram and ≥3% on LinkedIn across all posts in the 30 days.	Engagement rate per post
3	Traffic	Drive 8,000 website sessions, with at least 40% from social and 20% from organic search.	GA4 sessions by source (UTM-tagged)
4	Lead generation	Get 600 registrations for the free 'Build Your First AI App' workshop (12 Dec) and 150 counselling calls booked.	Form submissions, booked calls
5	Conversion	Enrol 40 paid learners into the January 2027 cohort at a cost per acquisition of ≤₹3,750.	Enrolments, CAC
6	Community	Receive 150 #ProjectNotPromise challenge submissions and grow the WhatsApp community to 1,000 members.	Submissions, community size

5. Competitor analysis

Competitors are grouped by type. Observations describe general, qualitative market patterns rather than detailed claims about any one company.

Type	Strengths	Weaknesses	Their content	Our opportunity
Global MOOC platforms e.g. Coursera, Udemy	Huge course catalogue, strong brand recognition, low price per course	Mostly self-paced; little personal mentorship or local placement help; many learners don't finish	Course ads, discount promotions, generic career content	Accountability and local, mentor-led project feedback
Large Indian upskilling companies e.g. upGrad, Scaler	Big brands, structured programs, large marketing budgets, strong outcome storytelling	Premium pricing; programmes often aimed at working professionals; sales-led enrolment process	Learner success stories, webinars, performance ads, LinkedIn thought leadership	Affordable option for tier-2/3 students with a friendlier, community-first tone
Offline training institutes e.g. Ameerpet-area coaching centres	Low fees, local presence, strong word of mouth, Telugu-friendly	Large batches, syllabus can lag industry, weak social media and branding	Banner ads, pamphlets, basic Facebook posts	Modern stacks (AI, cloud), deployed projects and a credible online presence
Free YouTube creators e.g. Telugu and English coding channels	Free, highly trusted, regional-language content, entertaining	No structure, feedback, deadlines or placement support	Long tutorials, Shorts, live streams	Turning watchers into builders through deadlines, reviews and a cohort

SWOT — Vidyut Labs

Strengths	Weaknesses	Opportunities	Threats
• Project-first curriculum with mentor code reviews • Bilingual (English + Telugu) support • Affordable pricing with EMI	• Small brand and follower base • Few alumni stories so far • Limited ad budget	• New Year resolution season • Growing interest in AI careers • Underserved tier-2/3 college students • Parents searching for trustworthy options	• Well-funded competitors • Abundant free content • Market distrust of 'placement guarantee' claims

6. Content pillars

Value first, selling second: promotional posts make up only about a fifth of the calendar.

Pillar	Share	What it includes	Why it matters	Examples
Educational Learn by Building	22%	Tutorials, project ideas, roadmaps, tool explainers, code tips	Builds authority and earns saves/shares; attracts students searching for help	5 beginner AI projects you can finish in a weekend; Deploy a site in 60 seconds; README writing guide
Informational Career Compass	22%	Job-market insights, role explainers, resume and interview advice, alumni stories, FAQs	Answers career anxiety; builds trust with switchers and parents	6 entry-level tech roles and the skills each needs; Day in the life of a junior developer; Honest answers for parents
Engagement Builder Community	35%	Polls, quizzes, memes, challenges, user-generated content, live sessions	Boosts algorithmic reach, builds community and generates UGC	#ProjectNotPromise challenge; 'Guess the output' code quizzes; Relatable developer memes
Promotional Inside Vidyut	20%	Workshop and cohort announcements, testimonials, offers, deadlines	Converts warm audience into leads and enrolments — capped at ~20% so the feed never feels like an ad	Free workshop announcement; Jan 2027 cohort: what you'll build; Early-bird closing reminder

7. Social media strategy

Each platform has a separate job, audience and content plan.

Instagram

Role	Primary awareness and community channel for students (18–24)
Audience	Ravi (students), some Sneha
Frequency	5–6 feed posts/week + daily Stories
Formats	Reels (9:16), carousels (4:5), Stories with polls/quizzes/countdowns, Lives
Best times (IST)	Weekdays 7–10 PM, weekends 11 AM–1 PM (starting hypothesis — confirm with Insights after week 2)
Tone	Friendly, energetic, relatable; Telugu-English mix in Reels
CTA	Follow, save, 'link in bio' to register, DM keywords (e.g. DM 'AI' for the workshop link)
KPIs	Reach, follower growth, saves, shares, profile link clicks

LinkedIn

Role	Credibility, career-switcher acquisition and employer/college relationships
Audience	Sneha (switchers), final-year students, TPOs, hiring partners
Frequency	3–4 posts/week (company page) + founder/mentor reposts
Formats	Text posts with a strong first line, document carousels (PDF), polls, event pages, alumni stories
Best times (IST)	Tue–Thu, 8–10 AM and 12–2 PM (starting hypothesis)
Tone	Professional, helpful, insight-led; no hard selling
CTA	Comment, follow the page, register for the event, book a counselling call
KPIs	Impressions, engagement rate, follower growth, event registrations

Website / Blog

Role	Conversion hub and SEO engine — every campaign lands here
Audience	All personas, especially high-intent searchers and parents
Frequency	1 SEO blog/week + 2 landing pages (workshop, challenge)
Formats	Long-form blog posts (1,200–1,800 words), landing pages, FAQ, alumni stories page
Best times (IST)	Publish Tuesday morning; share on socials the same day
Tone	Clear, trustworthy, detailed
CTA	Register for workshop, book counselling call, download syllabus
KPIs	Sessions, organic traffic, landing-page conversion rate, form fills

YouTube Shorts (supporting)

Role	Repurpose Instagram Reels for extra reach at zero extra production cost
Audience	Students who search tutorials
Frequency	3 Shorts/week (repurposed Reels)
Formats	Shorts (9:16, under 60 s)
Best times (IST)	Evenings
Tone	Same as Instagram
CTA	Subscribe, link to workshop
KPIs	Views, subscribers

WhatsApp community (supporting)

Role	Nurture leads and reach parents directly
Audience	Workshop registrants, parents
Frequency	2–3 broadcasts/week
Formats	Reminders, short videos, polls, PDF guides
Best times (IST)	7–9 PM
Tone	Personal and helpful; Telugu + English
CTA	Attend workshop, book call
KPIs	Members, attendance rate

8. Campaign ideas

Four campaigns move the audience through the funnel: awareness → leads → engagement → enrolment.

Projects > Certificates

When	Week 1 (Day 1–7)
Goal	Awareness
Big idea	A myth-busting series showing that recruiters look at what you've built, not how many certificates you have. Sets up the brand's core belief.
Assets	Opening Reel, LinkedIn document carousel, SEO blog, Story polls
Success metric	Reach 60,000 accounts; +500 Instagram followers

Build Your First AI App (free workshop)

When	Week 2 (Day 5–14, workshop on Sat 12 Dec)
Goal	Lead generation
Big idea	A free 3-hour online + offline workshop where beginners build and deploy a simple AI app. Registration collects leads; attendees get a follow-up counselling call.
Assets	Announcement Reel, event page, countdown Stories, WhatsApp reminders, live coverage, recap Reel
Success metric	600 registrations, 50% attendance, 150 counselling calls

#ProjectNotPromise Challenge

When	Week 3 (Day 15–22)
Goal	Engagement + UGC
Big idea	Build anything in 7 days, post it with #ProjectNotPromise and tag @vidyutlabs. Top 3 win 50% / 25% / 25% scholarships; community votes for a 'People's Choice'.
Assets	Launch Reel, rules landing page, idea carousel, UGC reposts, voting Stories, winners Reel
Success metric	150 submissions; 400 hashtag uses; engagement rate ≥6%

New Year, New Stack

When	Week 4 (Day 22–30)
Goal	Conversion
Big idea	Enrolment push for the January 2027 cohort with an early-bird fee ending 30 Dec. Uses alumni stories, a transparent fee/EMI explainer and a Telugu parent open house to remove objections.
Assets	Cohort carousel, syllabus document, parent open house, countdown Stories, retargeting ads
Success metric	40 enrolments; CAC ≤ ₹3,750

9. 30-day content calendar (1–30 Dec 2026)

49 pieces of content: Instagram 28, LinkedIn 16, Website 5. Hashtags and status tracking are in the Excel version (content-calendar/30-day-content-calendar.xlsx).

#	Date	Platform	Pillar	Format	Topic / hook	CTA
1	Tue 01 Dec	Instagram	Engagement	Reel	**Certificates vs projects** POV: you have 14 certificates and 0 interview calls.	Follow for project ideas
1	Tue 01 Dec	LinkedIn	Informational	Document carousel	**What hiring managers check in a fresher's GitHub** Your resume opens the door. Your GitHub decides if you walk in.	Follow the page
1	Tue 01 Dec	Website	Informational	Blog	**Projects vs Certificates: What Gets Freshers Hired in 2027** Keyword: projects for freshers resume	Read → join workshop waitlist
2	Wed 02 Dec	Instagram	Educational	Carousel	**5 beginner AI projects you can finish in a weekend** No PhD needed. Just a laptop and a weekend.	Save this for later
3	Thu 03 Dec	LinkedIn	Educational	Document carousel	**Full-stack roadmap 2027: what to learn first (and what to skip)** Most beginners learn things in the wrong order.	Comment 'ROADMAP' for the PDF
3	Thu 03 Dec	Instagram	Engagement	Story poll	**Which stack are you learning?** MERN / Python+Django / Java Spring / Still deciding	Vote
4	Fri 04 Dec	Instagram	Informational	Carousel	**6 entry-level tech roles and the skills each needs** Not everyone has to be a 'software engineer'.	Share with a friend who's confused
5	Sat 05 Dec	Instagram	Promotional	Reel	**Free workshop: Build Your First AI App — Sat 12 Dec** In 3 hours you'll build and deploy your first AI app. Free.	Register via link in bio / DM 'AI'
5	Sat 05 Dec	LinkedIn	Promotional	Event post	**Build Your First AI App — free workshop** Beginners welcome. You leave with a live, deployed app.	Register on the event page
6	Sun 06 Dec	Instagram	Educational	Reel	**Deploy a website in 60 seconds with Netlify** Your project isn't real until it has a link.	Save + try it tonight
7	Mon 07 Dec	LinkedIn	Engagement	Poll	**Biggest blocker to your first dev job?** No projects / No guidance / No referrals / Interview fear	Vote + comment
8	Tue 08 Dec	Instagram	Educational	Carousel	**Prompt → API → App: how an AI app actually works** Every AI app you use follows these 4 steps.	Save
8	Tue 08 Dec	Website	Educational	Blog	**How to Build Your First AI App: A Beginner's Guide** Keyword: how to build an ai app for beginners	Register for the free workshop

#	Date	Platform	Pillar	Format	Topic / hook	CTA
9	Wed 09 Dec	Instagram	Engagement	Reel (meme)	**Debugging at 2 AM** Me after 3 hours vs the missing semicolon.	Tag your coding buddy
9	Wed 09 Dec	LinkedIn	Informational	Text post	**Mentor spotlight: 3 lessons from 8 years of shipping production code** The first code review I got had 47 comments.	Follow for more mentor stories
10	Thu 10 Dec	Instagram	Engagement	Stories (countdown + Q&A;)	**2 days to the workshop — ask us anything** Countdown sticker + question box	Set reminder
10	Thu 10 Dec	LinkedIn	Educational	Document carousel	**GitHub profile checklist for freshers** 10 fixes that take one evening.	Save + share
11	Fri 11 Dec	Instagram	Educational	Carousel	**Workshop prep: install these 3 tools before Saturday** VS Code, Python and a free API key.	Register if you haven't
12	Sat 12 Dec	Instagram	Engagement	Live + Stories	**Workshop day — live from the lab** Behind the scenes as 300 beginners build together.	Join live
12	Sat 12 Dec	LinkedIn	Engagement	Post + photos	**Workshop is live** Today, beginners are deploying their first AI apps.	Follow for the recap
13	Sun 13 Dec	Instagram	Engagement	Reel	**Workshop recap: what you built** From 'hello world' to a live AI app in 3 hours.	Comment your app link
14	Mon 14 Dec	LinkedIn	Informational	Text post	**What our workshop learners built in 3 hours** Screenshots of real apps from first-time builders.	Book a free counselling call
15	Tue 15 Dec	Instagram	Engagement	Reel	**Launch: #ProjectNotPromise challenge** Build anything in 7 days. Post it. Win a scholarship.	Join — rules in bio
15	Tue 15 Dec	LinkedIn	Engagement	Post	**#ProjectNotPromise — a 7-day build challenge** Promises don't get you hired. Projects do.	Participate or tag a student
15	Tue 15 Dec	Website	Engagement	Landing page	**#ProjectNotPromise: rules, prizes and submission form** Keyword: final year projects for cse students	Submit your project
16	Wed 16 Dec	Instagram	Educational	Carousel	**10 challenge project ideas (beginner → advanced)** Stuck on what to build? Pick one tonight.	Save + start building
17	Thu 17 Dec	LinkedIn	Educational	Document carousel	**How to write a README that recruiters actually read** Your README is your project's sales page.	Save
17	Thu 17 Dec	Instagram	Engagement	Story quiz	**Guess the output** 4 code snippets — how many can you get right?	Answer + share score

#	Date	Platform	Pillar	Format	Topic / hook	CTA
18	Fri 18 Dec	Instagram	Informational	Reel	**Day in the life of a junior developer in Hitech City** Stand-up, code review, chai, deploy.	Follow for more
19	Sat 19 Dec	Instagram	Engagement	Reel (UGC)	**Best #ProjectNotPromise builds so far** You built WHAT in 4 days?	Submit before 21 Dec
19	Sat 19 Dec	LinkedIn	Informational	Text post	**From manual tester to React developer: an alumni story** At 26, Pavani thought it was too late to switch.	Book a counselling call
20	Sun 20 Dec	Instagram	Educational	Carousel	**Free resources we actually recommend** freeCodeCamp, MDN, CS50 and how to use them well.	Save
21	Mon 21 Dec	LinkedIn	Engagement	Post	**Vote for the People's Choice project** Top 10 builds from the challenge — you pick the winner.	Vote in comments
21	Mon 21 Dec	Instagram	Engagement	Story poll	**People's Choice voting** Swipe through finalists and vote.	Vote
22	Tue 22 Dec	Instagram	Promotional	Reel	**Challenge winners + scholarships** 3 builders just won scholarships for the January cohort.	Congratulate them
22	Tue 22 Dec	Website	Informational	Blog	**Full Stack Developer Course in Hyderabad: How to Choose** Keyword: full stack developer course in hyderabad	Download syllabus
23	Wed 23 Dec	Instagram	Promotional	Carousel	**Jan 2027 cohort: the 4 projects you'll build in 12 weeks** Week 1 you code. Week 12 you're interview-ready.	Link in bio — early-bird
23	Wed 23 Dec	LinkedIn	Promotional	Document carousel	**January 2027 cohort syllabus** 12 weeks, 4 deployed projects, 1 mentor who reviews every line.	Download syllabus
24	Thu 24 Dec	Instagram	Informational	Carousel	**Fees, EMI and scholarships — straight answers** No hidden costs. No '100% placement' promises.	DM 'FEES'
25	Fri 25 Dec	Instagram	Engagement	Reel	**Christmas special: all I want is a job offer** Festive coding meme.	Tag a friend
26	Sat 26 Dec	Instagram	Promotional	Reel + Live	**Parent open house (Telugu + English) — Sat 26 Dec** Meet mentors, see student projects, ask anything.	Book a slot
26	Sat 26 Dec	LinkedIn	Informational	Text post	**Questions parents ask before paying for a course — our honest answers** 'Is there a guarantee?' Here's our honest answer.	Share with parents
27	Sun 27 Dec	Instagram	Educational	Reel	**Your 2027 learning plan in 60 seconds** 12 months, 1 plan, 0 confusion.	Save

#	Date	Platform	Pillar	Format	Topic / hook	CTA
28	Mon 28 Dec	LinkedIn	Promotional	Text post	**3 days left for early-bird pricing** Pavani started exactly where you are.	Book a call
28	Mon 28 Dec	Instagram	Promotional	Stories (countdown)	**Early-bird ends in 3 days** Countdown sticker + FAQ highlights	Tap the link
29	Tue 29 Dec	Instagram	Engagement	Carousel	**2026 recap: our community's year** Workshops, challenges and every project you shipped.	Comment your 2027 goal
29	Tue 29 Dec	Website	Informational	Blog	**Your 2027 Roadmap to a First Developer Job (Month by Month)** Keyword: how to get first developer job	Join the January cohort
30	Wed 30 Dec	Instagram	Promotional	Reel	**Last day: early-bird closes tonight** Start 2027 building, not scrolling.	Enrol — link in bio
30	Wed 30 Dec	LinkedIn	Promotional	Post	**Last call + thank you** Thank you to everyone who built with us this month.	Enrol or share

10. Content formats

Format	Specs	Best used for	Best practice
Instagram Reel	9:16, 1080×1920, 15–45 s	Reach and discovery; tutorials, memes, recaps	Hook in first 2 seconds, on-screen captions, trending audio
Instagram carousel	4:5, 1080×1350, 6–10 slides	Saves; step-by-step education, lists	Bold cover slide, one idea per slide, CTA on last slide
Instagram Stories	9:16, 1080×1920	Daily touchpoint; polls, quizzes, countdowns, Q&A;	Use interactive stickers, link sticker for registrations
Instagram / LinkedIn Live	Live video, 30–60 min	Workshop coverage, AMAs with mentors	Announce 48 h before; pin a comment with the link
LinkedIn text post	150–250 words	Insights, stories, opinions	Strong first line, short paragraphs, end with a question
LinkedIn document carousel	PDF, 1080×1350, 8–12 pages	Roadmaps, checklists, syllabus	Value-first; brand only on first and last page
LinkedIn poll	2–4 options, 1 week	Audience research and engagement	Share results in a follow-up post
Blog article	1,200–1,800 words	SEO traffic and trust	Target one keyword, add FAQs, internal links, CTA box
Landing page	Single page	Conversions (workshop, challenge, cohort)	One CTA, social proof, short form, UTM tracking
YouTube Short	9:16, under 60 s	Extra reach from repurposed Reels	Re-edit captions; add subscribe CTA
User-generated content (UGC)	Reposts with credit	Social proof and community	Always ask permission and tag the creator
WhatsApp broadcast	Short text + image/video	Lead nurturing and reminders	Max 2–3 per week to avoid fatigue

11. Hashtag & keyword strategy

Hashtag sets

Tier	Hashtags
Branded	#VidyutLabs #BuildWithVidyut #ProjectNotPromise #NewYearNewStack
Niche / local	#HyderabadTech #BTechLife #EngineeringStudents #FullStackDeveloper #LearnAI #CodingForBeginners #TeluguTech #FresherJobs
Broad	#Coding #ArtificialIntelligence #WebDevelopment #TechCareers #Programming #CareerGrowth

Rules

- Instagram: 3–5 hashtags per post — 1–2 branded + 2–3 niche/local. Fewer, more relevant hashtags work better than long lists.
- LinkedIn: 3 hashtags per post — 1 branded + 2 professional (#TechCareers, #FullStackDeveloper).
- Every campaign gets one branded hashtag so its posts and user content can be tracked.
- Put keywords in captions and on-screen text too — Instagram and LinkedIn search read captions, not just hashtags.
- Review hashtag performance every week and swap out tags that bring no reach.

SEO keywords for the website

Keyword	Intent	Priority	Where used
full stack developer course in hyderabad	Commercial	High	Blog (Day 22) + course page
ai ml course in hyderabad	Commercial	High	Course page + cohort landing page
how to build an ai app for beginners	Informational	Medium	Blog (Day 8) → workshop
projects for freshers resume	Informational	Medium	Blog (Day 1)
final year projects for cse students	Informational	High	Challenge landing page + carousel
how to get first developer job	Informational	Medium	Blog (Day 29)
coding course with placement support	Commercial	Medium	Course page FAQ
full stack developer roadmap 2027	Informational	Medium	LinkedIn document + blog
career switch to software developer	Informational	Medium	Alumni story page
free ai workshop hyderabad	Transactional	Low–Medium	Workshop landing page

Keywords were brainstormed from persona pain points and checked for relative interest in Google Trends (Telangana / India) and keyword-research tools. Priorities are relative, not exact search volumes.

12. Marketing KPIs & measurement

Stage	KPI	Formula / definition	Tool	30-day target	Review
Awareness	Reach	Unique accounts that saw content	Platform insights	2,00,000 (30 days)	Weekly
Awareness	Follower growth	(End followers − start followers) ÷ start followers	Platform insights	Instagram +150%; LinkedIn +140%	Weekly
Engagement	Engagement rate	(Likes + comments + shares + saves) ÷ reach × 100	Insights + Sheet	Instagram ≥5%; LinkedIn ≥3%	Per post
Engagement	Saves & shares	Total saves + shares	Instagram Insights	≥3,000 combined	Weekly
Engagement	Challenge submissions	Posts using #ProjectNotPromise	Hashtag search + form	150	Daily (Week 3)
Traffic	Website sessions	Sessions from all sources	Google Analytics 4	8,000	Weekly
Traffic	Click-through rate (CTR)	Link clicks ÷ impressions × 100	Ads Manager / LinkedIn	≥1.2% on ads	Weekly
Leads	Workshop registrations	Completed registration forms	Form tool / GA4	600	Daily (Week 2)
Leads	Landing-page conversion rate	Registrations ÷ landing-page visitors × 100	GA4	≥20%	Weekly
Leads	Cost per lead (CPL)	Ad spend ÷ leads	Ads Manager + Sheet	≤₹120	Weekly
Leads	Workshop attendance rate	Attendees ÷ registrations × 100	Zoom/attendance list	≥50%	After event
Conversion	Counselling calls booked	Calls booked via calendar link	Calendar / CRM sheet	150	Weekly
Conversion	Enrolments	Paid sign-ups for Jan 2027 cohort	Payment records	40	Weekly
Conversion	Customer acquisition cost (CAC)	Total marketing spend ÷ enrolments	Sheet	≤₹3,750	End of month
Conversion	Return on ad spend (ROAS)	Revenue from ads ÷ ad spend	Sheet	≥5×	End of month
Community	WhatsApp community members	Total members	WhatsApp	1,000	Weekly

Measurement plan

- Tag every link with UTM parameters: utm_source=instagram|linkedin|whatsapp, utm_medium=organic|paid, utm_campaign=ai-workshop|projectnotpromise|newyear-stack.
- Track all numbers in the 'KPI Tracker' sheet every Monday; compare actual vs target.
- Weekly 30-minute review: double down on the top 3 posts' formats, drop the bottom 3.
- After Day 14, adjust posting times based on real Instagram/LinkedIn audience data.
- End-of-month report: what worked, what didn't, learnings for the January cohort.

13. Budget

Line item	Amount	Share
Paid social ads (Instagram + LinkedIn)	₹90,000	60%
Creator / college-ambassador collaborations	₹30,000	20%
Design & scheduling tools	₹15,000	10%
Challenge prizes & workshop costs	₹10,000	7%
Contingency	₹5,000	3%
Total	**₹150,000**	**100%**

14. Conclusion & key learnings

This plan treats marketing as a funnel: useful content earns attention, a free workshop and a challenge turn attention into leads and community, and honest, objection-handling content converts leads into enrolments. Every post has a pillar, a platform-specific format and a measurable goal.

- **Audience first:** personas decide channels, tone and offers — parents need trust, students need proof, switchers need flexibility.
- **Value before selling:** keeping promotion to ~20% protects reach and credibility.
- **Platform-native content:** the same idea becomes a Reel on Instagram, a document carousel on LinkedIn and an SEO article on the website.
- **Measure and adapt:** UTM links and a weekly KPI review turn the calendar into a living plan, not a fixed schedule.
- **Campaigns need a hook and a deadline:** a free workshop, a 7-day challenge and an early-bird date give people a reason to act now.
